

# PRECISIONRAP

FAMILY OF ERGONOMIC HAND WRAPPING SYSTEMS  
AND HIGH PERFORMANCE FILMS

Ensure your cargo arrives in as-made condition every time. Precisionrap, the ultra-smart handheld pallet wrapping system puts consistent, machine-quality wrapping and load containment in the palm of your hand.

## Hand wrap with machine-quality consistency.

Precisionrap is precise, easy-to-use and gives you uniform, machine-quality wrapping and containment every time. Even inexperienced operators will wrap like a pro.

## Reduce fatigue and workplace injury.

Hand pallet wrapping is awkward and wears on the body. Our lightweight, ergonomic system is used from a forward-facing, standing position and does the film stretching.

## Shrink packaging costs and get to market faster.

With Precisionrap, you will get machine-wrapped quality using less film, in less time, than traditional hand wrapping techniques.

- Lightweight
- Easy storage magnets
- Magnetic braking system with 3 position tension adjuster
- 17" film rolls

Compatible films:

- Precisionrap
- Precisionrap DK
- Colour
